European Journals of Plant Physiology

Journal of Experimental Botany (JEB) vol. 37	Physiologia Plantarum (PP) vol. 66, 67, 68	Physiologie Végétale (PV) vol. 24

Subject Index 1986

Carbon metabolism

assimilate partitioning,
  CO_2 level, seedling growth, citrus, PP(67) 477
  plant/root nodules, soybean, ^{13}C labelling, PP(68) 238
carbohydrate metabolism,
  link with secondary metabolism, PP(66) 164
  partitioning, temperature and irradiance effects, barley leaves, PP(66) 365
  sucrose synthase, wheat leaves, PP(67) 37
  sugar, starch, germination, pea, PP(67) 49
carbon assimilation, photorespiration, corn leaf mitochondria, PP(67) 442
carbon partitioning,
  leaf sugars, cold blocked translocation, broad bean, PP(68) 145
  night temperature effects, rose, PP(67) 608
  nodule respiration, soybean, JEB 985
  root nodules, compartmental analysis, JEB 994
carbon utilization, nitrogen source effects, symbiosis, JEB 786
chloroplasts, energy charge effects, enzyme regulation, millet, PV 63
CO_2 assimilation,
  anaerobiosis, astringency removal, kaki, PP(67) 644
  respiration, stomatal conductance, wheat, flag leaf and ear, PP(68) 451
CO_2 fixation,
  PEP carboxylase, homoserine synthesis, pea seedlings, PV 411
  inhibition, methionine sulphoximide, JEB 221
  products, enzyme activities, chickpea, PP(66) 457
CO_2 release, CAM plants, leaf conductance, stomatal control, PP(68) 353
enzyme activities, guard cell and mesophyll protoplasts, JEB 119
glycolytic intermediates, anaerobiosis, nitrate effects, rice roots, JEB 1472
lipid, acyl composition, wheat leaf, moss protonema, PP(68) 467
pentose phosphate/glycolytic pathways, dormancy breakage, peanut, JEB 80
photosynthate partitioning, potato tuber growth, zeatin effects, JEB 1804
respiration pathways, simulated seed deterioration, soybean, JEB 1364
respiration,
  alternative pathway,
    aphid infection, legume growth, PP(68) 329
    inhibitors, wild oats, PP(67) 43
    mitochondria, seed germination, JEB 262
    review, PP(66) 569
  alternative and cytochrome pathways, aphid effects, legumes, PP(67) 447
  pregerminative rates, regulation by nitrate, weed species, JEB 1516
  SHAM-sensitivity, NADH oxidation, plasmalemma from wheat root, PP(68) 67
rice caryopse cultivars, sucrose/starch partitioning, PP(68) 367
root respiration, root aeration, aerenchyma, mangrove, JEB 1225
starch metabolism, enzyme activities, potato tuber growth, JEB 1795
starch turnover, sucrose feeding, shoot-forming tobacco callus, PP(66) 58
sterols, steryl esters, steryl glycosides, changes in grass tissues, PP(68) 335
sucrose biosynthesis, metabolic pathways, control, PP(67) 118
sucrose starvation, phospholipids, rice synchronous cultures, PP(66) 191
sulfated polysaccharides, sulfate turn-over, marine algae, PV 347

Cell, tissue and organ cultures

callus tissues, polysaccharide synthesis, 2,4-D effects, PP(66) 49
carnation node explant, osmotic shock, vitrification, membrane permeability, PV 647
cell cultures,
  anthocyanin accumulation, heterogeneity, JEB 48
  electrophysiology, sucrose uptake, PCMBS effects, PP(68) 391
  halophyte, proline accumulation, NaCl stress, PP(67) 173
  high aeration rate inhibition, CO_2 supply effect, JEB 1911
  mitosis inhibition by carbanilates, PP(66) 536
  potato, hydroxyproline-resistant lines, salt tolerance, PP(68) 359
  sycamore,
    herbicide series, effects on mitosis/respiration/photosynthesis, PV 97
    tonoplast biochemical properties, PV 85
  tobacco, melibiose as non-permeating osmoticum, JEB 1079
cultured anthers, microspore embryogenesis, Co/Ag inhibition, ethylene stimulation, PP(68) 141
cultured pine cotyledons, dicyclohexylamine effects, polyamine levels, PP(66) 41
cultured tissues, willow, ammonium-induced vitrification, PP(66) 94
embryo culture, ovulate cones, regulation, differentiation, JEB 1633
excised barley roots, nickel influx, ion binding, desorption, PP(68) 583
excised embryos, coniferous trees, cytokinin metabolism, PP(66) 427
excised flowers, gibberellin distribution, tomato, PV 37
isolated cuticles, herbicide penetration, partition coefficient, PV 491
leaf callus, differentiation, thiophene content, marigold species, PP(66) 392
leaf explants, root, callus, bud initiation, polyamine involvement, PP(68) 589
mycorrhizal mushroom hyphae, root factors, CO_2 effects, PP(67) 521
pea protoplasts, lysine transport, mechanisms, JEB 549
plant regeneration, somaclonal variation, field trial, wheat, JEB 1065
protoplasts,
  alkaloid transport, exogenous and endogenous, mechanism, PV 419
  callus cultures, nicotine biosynthesis, tobacco, PP(68) 667
  callus, lipid content changes, PP(67) 211

carrot, glycine metabolism, gas chromatography, mass spectrometry, PV 1
electromanipulation, fusion, transfection, PP(67) 507
enzymatic isolation, membrane potential, JEB 238
guard cells,
mesophyll, carbon metabolism, JEB 119
potassium uptake, swelling, PP(66) 469
swelling responses, ion specificity, PP(66) 463
isolation, survival, ethylene and ethane release, tobacco, PP (66) 303
mannitol metabolism, doubtful osmoticum, PP(67) 365
membrane potentials, pressure effects, JEB 315
membrane properties, fusion, rape, PP(67) 359
nitrate and malate accumulation, vacuolar pH, PV 15
pea stem, sugars, differential uptake, JEB 1164
peanut, peroxidase release, tunacamycin effect, JEB 1708
pear, 2,4-D deprived, ethylene and ABA effects, PV 581
plant regeneration,
ploidy variation, wild potato, JEB 253
zeatin, GA_3, PV 391
rapeseed hypocotyl, callus formation, PP(66) 1
soybean roots, plasma membrane, gold labelling, PP(66) 270
tomato, RNAse activity localization, PP(66) 79
vacuole preparation, solute losses, vacuole selection, PP(68) 695
synchronous cultures, rice, phospholipids, sucrose starvation, PP(66) 191
tissue culture, wild soybean, plant regeneration, PP(68) 125
tobacco callus, shoot initiation, sucrose feeding, starch turnover, PP(66) 58
wheat leaf cultures, 2,4-D level, differentiation, PP(68) 597

Cell walls

acidification, auxin-stimulated growth, vanadate, JEB 270
bacteroid cell wall, peptidoglycan digestion, nodule senescence, bean, PV 697
cell wall potential, intact cells, protoplasts, JEB 238
composition, pine hypocotyl, osmotic potential changes, PP (67) 377
extracellular proteins, localization, peroxidase, pea internode, PP(67) 397
hemicelluloses, changes, ethylene, ripening, hot pepper fruit, PP(66) 31
inhibition of formation, recovery, root hairs, JEB 1201
mycorrhizal symbiosis, ultracytological analysis, PV 245
pectic polysaccharide hydrolysis, galactosidase, carrot cells, PP (68) 46
polysaccharides, turn-over of sulfate groups, marine algae, PV 347
regeneration, cell cycle parameters, cotton protoplasts, JEB 1211
synthesis, auxin induction, galactose inhibition, oat coleoptile, PP(66) 370

Environmental physiology

adaptation, submerged macrophyte, photosynthetic characteristics, growth, PP(68) 502
circadian leaf movements, effects of alkali ions, PP(66) 139
circadian rhythm,
cellular, molecular basis, clock mutants, PV 367
stomatal opening, ion flux involvement, JEB 188
CO_2 level, growth, assimilate partitioning, citrus seedlings, PP (67) 477
differential root/shoot temperatures, ion accumulation, growth, barley, PP(67) 159
diurnal petiolar movements, IAA excitation of primary pulvinus, *Mimosa*, PP(68) 196
environmental factors, red/far-red ratio, response of *Plantago*, PP(68) 252
fluctuating environment, genotypes, growth, adaptation, PP (67) 217
fruiting and defruited peach trees, leaf gas exchanges, PP(66) 149
light intensity,
nitrate uptake-reduction-storage, daily changes, spinach, PP (66) 550
oxygen level, effects on nitrate metabolism, eggplant, PP (67) 73
perennial ryegrass, nutrient supply/cutting/competition effects on yield and respiration, PP(66) 53
phthalate plasticisers,
phytotoxicity,
radish bioassay, JEB 883
site and mode of action, JEB 898
population density, light repartition, shoot/root ratios, wheat, PP(66) 159
root ecophysiology, submerged vascular plants, PV 607
seasonal effects,
cambium ultrastructure, phenology, willow, PP(67) 529
leaf growth pattern, C_4 plant, JEB 1823
nitrogen compounds, autumnal changes, woody species, PP (67) 102
temperature effects, panicle differentiation, spikelet number, JEB 865
temperature,
irradiance, carbohydrate metabolism, barley leaves, PP(66) 365
light, moisture, effects on seed germination rate, pine, JEB 1376
thermotolerance, heat shock, GA effect, etiolated mung bean, PP(66) 595

Enzymes

ATPase, proton translocating, latex lutoids, PP(66) 108
adenosine phosphosulfate sulfotransferase, SO_2 effects, spruce, PP(67) 235
alcohol dehydrogenase, kinetics, hypoxia, barley, JEB 857
alpha-amylase, isoforms, rice scutellum, carbohydrate chain modification, PV 629
beta-amylase, immunohistochemical localization, barley, PP (67) 383
beta-galactosidase, purification from carrot cells, characteristics, PP(68) 46
carboxylating enzymes, activities, freshwater macrophytes, JEB 1568
carboxypeptidases, occurrence, germinating cereals, PP(67) 557
chloroplastic enzymes, site of synthesis, ribosome-deficient leaves, rye, PP(67) 145
dehydrogenases, NADP-linked, leaf distribution, maize, JEB 606
glutamate dehydrogenase,
isoforms, lupine roots and nodules, PP(67) 685
senescence induction, barley, PP(66) 451
willow cultured tissues, glassiness, PP(66) 94
glutamate synthase, NO_3^- and NH_4^+ nutrition, maize seedlings, PP(66) 413
glutamine synthetase,
activity, energy charge, tomato leaves, PP(66) 648
CO_2 fixation, methionine sulphoximide inhibition, JEB 221
copper toxicity, JEB 947
glycosidases, invertase, cell elongation, pearl millet, JEB 1406
glyoxysomal enzymes, gene regulation, maize development, JEB 1189
induction, maturation drying, seed development, castor bean, JEB 1887
isocitrate lyase, germination, soybean, JEB 1685

isoperoxidases, homology, flax genotrophs, JEB 1180
isozymes, plastidic phosphorylase, starch metabolism, pea, PP (66) 234
leaf sulfate reduction, regulation by H_2S and cysteine, pea, PP (67) 81
malate dehydrogenase, quality changes, high temperature imbibed seeds, JEB 99
malic enzyme, NADP-dependent, purification, heavy metal inhibition, chickpea, PP(68) 308
NADH dehydrogenases, mitochondria, malate oxidation, PP (67) 517
NADP-isocitrate dehydrogenase, root nodule cytosol, alfalfa, PP(67) 538
NADPH-protochlorophyllide oxidoreductase, localization, wheat etioplasts, PP(66) 616
nicotine biosynthesis, regulation of enzyme activities, tobacco, PP(68) 667
nitrate reductase, distribution, leaf ontogeny, nitrate nutrition, tomato, PP(68) 615
oleyl phosphatidylcholine desaturase, activity, temperature effect, safflower microsomes, PV 45
ornithine and arginine decarboxylases, leaf explant differentiation, PP(68) 589
ornithine decarboxylase, localization, polyamine content, maize root, PP(67) 485
peptidases,
  alkaline, purification, properties, bean cotyledons, PP(68) 81
  intracellular localisation, bean cotyledons, PP(68) 75
  proteinases, activities in germinating beans, PP(68) 282
peroxidases, anionic and cationic, separation by HPLC, O_3 stimulation, PP(68) 201
phenylalanine ammonia-lyase, rhytmic activity, duckweed, PP (66) 543
phosphatases,
  activities, PO_4 effects, phytase, polyphosphatases, fungus, PV 153
  ectomycorrhizal fungus, properties, phosphate starvation, PV 163
  extracellular, mycorrhizal fungus, phosphate nutrition, PV 173
  mycorrhizal fungus, phytate utilization, phosphate starvation, PV 193
phosphoenolpyruvate carboxylases, salt activation, glycophytes, halophytes, PP(67) 408
plasma membrane ATPase, characterization, phase partition, PV 25
protochlorophyllide oxidoreductase, prolamellar bodies, pine seedlings, PP(67) 345
RuBP carboxylase,
  correlation with stroma crystals, willow, JEB 89
  level,
    photosynthetic acclimation, tomato leaf, JEB 200
    wheatgrasses, JEB 625
  proteolysis, protease inhibitors, orange tree, PP(66) 377
  quantitation, non-hardened and hardened pine needles, PP (67) 199
serine carboxypeptidase, purification, wild-wheat hybrid, PMSF inhibition, PV 719
xanthine dehydrogenase, properties, nitrogen fixation, PV 263

Growth and development

apical dominance, release, poplar buds, rejuvenation, water relations, PP(68) 287
ascomycete differentiation, protein synthesis, pattern changes, PP(68) 403
cell division, cell wall regeneration, cotton protoplasts, JEB 1211
cell growth, glycosidases and invertase distribution, pearl millet, JEB 1406
chloroplast development, phytochrome, dark incubation, cucumber, PP(67) 389
correlations, shoot diameter, leaf size, flower size, sunflower, PP(68) 113
development,
  endomycorrhizal effects, physiology, biochemistry, PV 253
  fruit, seed, endogenous GAs, deficient genotypes, PP(67) 315
differentiation,
  bud, photocontrol, african violet, tomato, PP(67) 340
  dedifferentiation, leaf explants, polyamine involvement, PP (68) 589
diurnal growth, tomato fruit, osmotic potential effects, JEB 1294
dormancy,
  fusicoccin/GA effects, wild oat, PP(67) 690
  hard-seeds, imbibition, palisade cell histochemistry, weeds, PP(67) 320
  primary, secondary, breaking, ABA effects, apple, PP(67) 279
  ribosomal translation capacities, pine strobili, PP(66) 144
  seasonal changes of growth regulators, hazel buds, PP(66) 288
  seed, glumella influence, phenolic compounds, barley, PP (68) 301
elongation, internode length, gibberellin mutants, pea, PP(66) 417
embryo development, barley mutants, high lysine genes, PP (68) 410
embryo dormancy, heterogeneity, ABA level, chlorophyll formation, apple, JEB 1643
embryo viability, recalcitrant seed, desiccation, cryopreservation, JEB 1388
endosperm development, cell volume, high lysine mutants, barley, PP(67) 453
floral development, sterol compounds, changes in grass tissues, PP(68) 335
floral induction,
  ethylene production, similarity to stress, JEB 1218
  plasma membrane thickness, spinach leaves, PP(68) 1
floral initiation, apple, ammonia and polyamine stimulation, PV 673
flower senescence, cut rose flowers, physiological responses, PP(67) 205
flowering,
  induction by tannic acid, duckweed, PP(66) 447
  induction requirements, meadow foxtail, PP(66) 251
  inhibition, growth regulators, mandarin, PP(66) 515
gametangial formation, growth regulators, liverwort, JEB 1552
genetic differentiation, adaptation, optimal temperature, phytochrome, PP(66) 674
germinating embryos, vigour, viability, protein synthesis, wheat, PP(67) 310
germination,
  cell division timing, role of histone, PP(68) 259
  DNA synthesis, endoreduplication, castor bean, JEB 1716
  dormancy breakage, metabolism, peanut, JEB 80
  ethylene dependent action of GA, tetcyclacis inhibition, PP (67) 584
  growth, respiration inhibitor effects, wild oats, PP(67) 43
  imbibition, enzyme activities, tamarack, PP(67) 562
  lipolytic enzymes, glyoxysomal enzymes, castor bean, PP (68) 419
  pollen, protein and RNA synthesis, apple, PV 53
  polyethyleneglycol inhibition, reversal by etephon and ACC, PP(67) 588
  sugar and starch changes, pea cotyledon, PP(67) 49
growth analysis, method, PP(67) 223
growth capacity, photosynthetic activity, herbicide-resistant biotypes, PV 475
growth conditions, leaf position, physiological characteristics, corn, JEB 309

growth rate, nitrogen productivity, ectomycorrhiza, pine seedlings, PP(68) 575
growth,
actinorhizal plants, nitrogen fixation, PP(66) 99
respiration, aphid effects, legumes, PP(67) 447
hyphae growth, mycorrhizal mushroom, root factors, CO_2 effects, PP(67) 521
hypocotyl elongation, acid-induced, control by epidermal cells, lupin, PP(67) 61
hypocotyl growth, osmotic potential changes, cell wall composition, pine, PP(67) 377
leaf elongation, osmotic potential, spinach, JEB 1093
leaf growth pattern, seasonal effects, C_4 plant, JEB 1823
leaf ontogeny,
nitrate reductase distribution, nitrate nutrition, tomato, PP(68) 615
sulfate reduction enzymes, activity changes, pea, PP(67) 81
legume growth, aphid infestation, short term effects, PP(68) 329
maize development, glyoxysomal enzymes, gene regulation, JEB 1189
maturation, bean embryo, ABA level, metabolism influence, PV 453
microspore embryogenesis,
charcoal inhibitory interaction, PP(66) 602
Co/Ag effects, ethylene role, PP(68) 141
mixed cultures, copper tolerant/sensitive ecotypes, external detoxification, PP(67) 654
monocarpic senescence, surgical manipulation, harvest index, wheat, PP(67) 431
mycorrhizal symbiosis,
pattern of functioning, polyanion accumulation, PV 219
ultracytological analysis, PV 245
ontogeny, scale, leaf blade, onion, flavor precursors, PP(66) 293
orchid germination, germination factors, tetrazolium test, PP(67) 253
panicle differentiation, spikelet number, environmental influences, JEB 865
parasitism, dodder, host lipid levels, chloroplast as target, PV 443
phytoalexins, disease-resistance, susceptibility, PP(68) 343
plant regeneration, from cotyledon, leaf, wild soybean, PP(68) 125
pod fill, ineffective nitrate utilization, enhanced nitrogen fixation, PP(68) 689
pollen germination, stigma extract effects, TLC assay, JEB 406
relative growth rate, tissue phosphorus level, root temperature effect, JEB 1265
rhizogenesis, chestnut shoots, auxin changes, PP(66) 491
ripening,
ACC metabolism, apple, PP(66) 495
hot pepper fruit, biochemical changes, respiratory climacteric, PP(66) 31
root formation,
growth regulator levels, tomato mutants, PP(68) 426
pea cuttings, exogenous cytokinin effects, PP(68) 662
vitamin D_3 and indolylbutyric acid effects, woody cuttings, PP(68) 93
root growth, aerenchyma formation, ultrastructure, rice, JEB 832
root hair, formation, elongation, hairy zone, maize, PP(68) 653
root tip growth, rhizobium induced hair curling, computer simulation, PP(66) 476
secondary dormancy, wild oat, induction, breakage, PP(68) 27
seed development, transition to germination, maturation drying, castor bean, JEB 1887
seed germination,
constant temperature, water potential, beet, JEB 729
crystalloid storage protein hydrolysis, castor bean, JEB 1879
desiccation,
effects on mRNA, bean, JEB 364
effects on mRNA, pea, JEB 754
desiccation sensitivity, viability loss, mangrove, PP(67) 291
dormancy, GA synthesis, light effects, PP(67) 285
growth, amylase activity, lentil, PP(67) 370
light action, anoxia, cocklebur, JEB 1652
mitochondria, alternative respiration, JEB 262
osmotic pre-treatment, corn-cockle, JEB 765
photon dose, quantal response, grasses, JEB 742
photosensitivity, biphasic fluence response, PP(67) 275
phytochrome, alternating temperature, synergism, PP(67) 299
rate,
temperature effects, grain legumes, JEB 705
temperature effects, intraspecific variations, chickpea, JEB 1503
salinity, water potential, temperature, desert shrub, PP(67) 305
seed dormancy, ATP synthesis, quality, PP(66) 177
simulated seed deterioration, respiration pathways, JEB 1364
stratification, gibberellin-like substances, PP(66) 154
temperature, light, moisture effects on rate, pine, JEB 1376
seed viability test,
free radical content, EPR measurements, JEB 1675
tetrazolium test, scanning microscopy, orchids, PP(66) 435
seedling growth, moisture loss prerequisite, soybean, JEB 1663
senescence,
2,4-D deprived pear cells, ethylene and ABA effects, PV 581
cut carnation flowers, post-harvest physiology, PP(68) 323
cut carnation, polyamine effects, PP(66) 679
glutamate dehydrogenase induction, enzyme localisation, barley, PP(66) 451
hypobaric conditions, stomatal aperture, oat leaves, PP(66) 283
petals, ethylene production, lipid changes, peroxides, carnation, PP(67) 465
stress induced, N_2 fixation, alfalfa root nodules, JEB 597
tobacco leaf, nucleotide pools, PP(67) 666
wheat leaves, grain yield, nitrogen content, PP(66) 503
shoot development, amino acids, total nitrogen, pine seedlings, PP(67) 435
sprout rooting, ABA levels, poplar, aspen stump, PP(67) 638
stem growth, analysis, longitudinal and radial components, PV 109
temporary rest, oak growth, energy metabolism, permeability, apical bud, PV 307
thigmomorphogenesis,
cobalt inhibition, ethylene production, PP(67) 552
wind, mechanical perturbation,
Fraser fir, PP(66) 211
ethylene production, PP(66) 227
loblolly pine, PP(66) 219
tuber growth rate,
carbon partitioning, zeatin effects, potato, JEB 1804
starch metabolism, enzyme activities, potato, JEB 1795
stolon characteristics, tuber initiation, potato, JEB 1813
tuberization, Jerusalem artichoke, endogenous ABA, osmotic conditions, PV 655

Growth regulators

ABA,
apical growth, willow, PP(66) 409
bean embryo level, intracellular pH, oxidative metabolism, PV 453
effect on epidermal cells, stomatal movement, PP(66) 664
endogenous, Jerusalem artichoke tuberization, PV 655
GA, effects on morphogenesis, frost resistance, berseem clover, JEB 1542

^2H incorporation from heavy water, precursor pools, tomato shoot, JEB 1533
IAA,
longitudinal gradients, etiolated bean hypocotyl, JEB 1525
seasonal changes, dormancy of hazel buds, PP(66) 288
isolation, shoots, willow, PP(66) 406
potassium transport, long-term effects, wheat, PP(68) 637
ACC, ethylene, wilting, ABA effect, tomato mutant, JEB 535
benzyladenine,
effects on plastidial polypeptide pattern, watermelon, PP(68) 678
floral transition, long-day plants, PP(67) 695
cytokinins,
benzyladenine, metabolism, coniferous trees, PP(66) 427
bioassay, brassinolide effects, comparison with benzyladenine, PP(68) 603
biosynthesis, transfer RNAs, bryophytes, PP(67) 680
effects on photosynthetic activity and ultrastructure, PP(66) 685
uptake and translocation, apple shoot development, PP(68) 431
zeatin biosynthesis, isomers, clubroot disease, PP(66) 245
zeatin, effects on root formation, pea cuttings, PP(68) 662
2,4-D, differentiation, wheat leaf cultures, PP(68) 597
ethylene, production,
H_2O_2-manganese effects, mechanism, etiolated pea, PP(66) 625
calcium effect, tomato, potato, PP(66) 609
spinach leaves, floral induction, JEB 1218
fungicides, triadimefon, cytokinin and chlorophyll synthesis, cucumber, PP(66) 197
gibberellic acid, effects on phytase and phosphatase levels, barley, PP(67) 182
gibberellin,
ACC metabolism, apple, PP(66) 495
ACC, calcium dependency, root segments, maize, PP(67) 570
accumulation, ABA level, waterlogging, wilting, bean, PP(66) 257
binding, senescing carnation petals, JEB 526
gibberellin sensitivity, pea internode length, PP(67) 673
induced pigmentation, mandarin peel, GA and cytokinin effects, PP(68) 271
metabolism, ethylene oxygenase, PP(66) 723
distribution, transport, excised flowers, tomato, PV 37
endogenous, deficient genotypes, fruit and seed development, PP(67) 315
ethylene-dependent action, tetcyclacis inhibition, seed germination, PP(67) 584
synthesis by mutants, pea internode length, PP(66) 417
gibberellin-like substances, peach seed stratification, PP(66) 154
growth retardent, peach seed stratification, PP(66) 154
growth substance sensitivity, need for clearer ideas, PP(67) 267
herbicides,
carbanilates, cell cultures, motosis inhibition, PP(66) 536
foliar absorption, cuticular penetration, PV 491
glyphosate effects, photosynthetic pigments, stomatal response, clover, lucerne, PP(66) 63
isopropyl carbanilate series, effects on sycamore cells, PV 97
isoproturon, root growth, chloroplast ultrastructure, wheat, weed, PP(66) 563
norflurazon,
effects on ABA, gravistimulated maize roots, PP(67) 472
phytoene accumulation, plastoglobuli, wheat, PP(68) 39
paraquat resistance, transport, PP(66) 605
phenylcarbamate series, electron transfer, mitosis, PV 523
pyridazolinone, effects on photosynthesis, barley leaves, JEB 1558
hormones, long-term effects, potassium transport and levels, wheat, PP(68) 632
IAA,
biosynthesis, conjugation, tobacco crown gall, PP(68) 458
cell elongation, galactose inhibition, oat coleoptile, PP(66) 270
4-chloroindole-3-acetic acid, identification, Scots pine seeds, PP(68) 511
indole stability, antioxidant/solvent/temperature effects, Scots pine, PP(68) 519
oscillatory distribution, lupin hypocotyl growth, PP(66) 509
oxindole-3-acetic acid, turnover, oxidation, corn seedlings, JEB 1691
phenylacetic acid, occurrence, ostrich fern, PP(68) 396
production, ectomycorrhizal fungus, glucose effect, PV 185
stimulated growth, cell wall acidification, vanadate, JEB 270
triacontanol, stimulation of plasma membrane ATPase, barley root, PP(68) 20

Ions, uptake, transport, compartmentation

algal cell compartments, ionic relations, X-ray analysis, EM, JEB 1725
alkali ions, import from stem and leaf phloem loading, JEB 928
aluminium toxicity, nutrient solution, honeylocust, JEB 775
amino acid uptake, kinetics, transport systems, duckweed, JEB 1020
ammonium transport, regulation, ammonium inhibition, cyanobacteria, PP(68) 320
ammonium, uptake, transport, compartmental model, ^{13}N, maize, JEB 1619
anion uptake, chlorate-nitrate interactions, mutants, maize roots, PP(68) 107
apoplastic solute transport, lanthanum as tracer, halophytes, JEB 807
ATPase, proton transporting, potassium transport, reaction mechanisms, PP(68) 159
bicarbonate transport, salinity, marine algae, JEB 977
cadmium uptake, sugar beet, sugar accumulation, EDTA effects, PP(66) 69
cadmium, accumulation, toxicity, chelator effects, duckweed, PP(66) 87
calcium fluxes, control, proton pumping, membrane potential, corn roots, PP(67) 576
calcium nutrition, calmodulin content, tobacco leaves, PV 559
calcium, cytochemical localization, root cap cells, maize, JEB 73
chloride and nitrate uptake, ion carriers, regulation, pea seedlings, PP(66) 115
copper, uptake, subcellular localization, marine algae, PP(66) 692
cytoplasmic pH, short-term measurements, charophytes, JEB 1733
electrogenic pump, K-channel, membrane potential, resistance, algal cells, JEB 34
inorganic nutrients, relative uptake rates, nitrogen source, JEB 419
ion distribution, nectary hairs, X-ray microanalysis, JEB 940
ion redistribution, xylem, phloem, tomato, JEB 331
ion transport,
corn root aerenchyma, oxygen deficiency, JEB 22
monovalent cations, divalent ions effects, PP(66) 712
phosphate, root, stolon, white clover, JEB 577
sodium, efflux, potassium content, PP(66) 705
ion uptake, ammonium, diurnal variation, ryegrass, JEB 589
leaf salt balance, halophyte, mangrove, PP(67) 67
lysine transport, pea protoplasts, mechanisms, JEB 549
metal complexes, metallothionein, poly(glutamylcysteinyl)glycines, angiosperms, PP(67) 499
nickel influx, free space uptake, ion binding, barley roots, PP(68) 583
nitrate, malate, accumulation, vacuolar pH, PV 15

nitrate fluxes,
compartmental analysis, barley roots, JEB 1753
kinetic parameters, nitrogen status, JEB 1768
nitrate transport, tracer techniques, barley seedlings, JEB 429
nitrate-uptake mutant, ionic uptake, submerged cultures, PP (66) 264
nutrient inflow rates, limits, root systems, PP(68) 551
pH homeostasis, nitrate/ammonium ratio, soybean, JEB 341
phosphate transport,
P-Zn interactions, cotton, sunflower, buckwheat, PP(68) 483
aged potato discs, pH and inhibitor effects, PV 551
potassium, uptake, guard cell protoplasts, swelling, PP(66) 469
potassium channel, temperature effects, resting potential, JEB 440
potassium fluxes, salt-tolerant tomato species, growth, PP(67) 415
potassium levels and transport, hormone long-term effects, wheat, PP(68) 632
potassium supply, effects on growth/K^+ content/K^+ uptake, barley, PP(66) 122
potassium transport, ABA long-term effects, wheat, PP(68) 637
proline accumulation, ABA-induced, potassium-sodium effects, barley, PP(67) 123
proton extrusion,
light intensity effect, corn roots, PP(67) 614
monovalent and divalent cations stimulation, maize root, PP (68) 497
proton flux, stelar proton pump, fusicoccin, onion roots, JEB 1136
radial cation transport, electron probe X-ray microanalysis, aerenchyma, JEB 823
radial ion transport, halophyte, relation to growth, roots, JEB 143
rubidium uptake, temperature effect, algae, JEB 1285
salinity effects, ion distribution, ultrastructure, wheat leaf, JEB 1
salinity, ion distribution, ultrastructure, roots, PP(66) 328
salt glands,
morphometric analysis, ion fluxes, JEB 471
secretion, functional aspects, JEB 1129
transfusion zone, ion flux determination, JEB 482
ultrastructure, ion secretion, JEB 461
sodium and potassium uptake, halophyte,
effects on growth, PP(67) 15
transpiration effects, PP(67) 1
transport regulation, PP(67) 7
sodium-calcium interactions, plasmalemma, JEB 321
solute accumulation, salt tolerance, stress resistant crops, JEB 1435
solute uptake, concentration effects, phloem loading, mesophyll and veins, JEB 1899
sulphite/bisulphite uptake, gaseous emissions, ryegrass genotypes, JEB 556
transport mechanisms, ionic channels, patch clamp technique, PV 227
transport, active/passive, membrane potential, light effect, algal cells, JEB 8

Light sensitivity

action spectra, chlorophyll formation, phytochrome, wheat leaves, PP(66) 277
action spectrum, protochlorophyll photoconversion, alga mutant, PP(68) 119
blue light,
induced potentials, oat coleoptile, PP(68) 620
regulation of stomata, red light synergism, wheat, PP(66) 202
stomata regulation, action spectrum, wheat, PP(66) 207
carotenogenesis, reinvestigation on red light effects, fungus, PP(68) 648
chlorophyll synthesis, cytokinin and potassium stimulation, cucumber, PP(68) 169
circadian rhythm, phase shifting by red-light pulses, PP(67) 604
far-red, cotton leaves, ionic content, drought resistance, PP (66) 37
high light growth, cyanobacteria, reversible hydrogenase activity, PP(67) 634
irradiance level, ATPase activity, adaptation, PP(66) 674
light actions, germination, anoxia, cocklebur, JEB 1652
light gradient measurements, comments and reply, PP(67) 493
light gradients, light scattering, optical properties of plants, PP (68) 704
light intensity, thylakoid membrane, tomato leaf acclimation, JEB 211
light regimes, effects on cadmium accumulation and toxicity, duckweed, PP(66) 87
light requirements, tropical vascular epiphytes, CAM plants, PV 315
near UV, algal growth, PP(67) 598
photocontrol,
phytochrome, cryptochrome, bud differentiation, african violet, tomato, PP(67) 340
plastidic phosphorylases, starch metabolism, pea, PP(66) 234
photon dose, seed germination, quantal response, grasses, JEB 742
photoperiod,
CO_2 assimilation, RuBisCO activity, soybean, PV 591
frost hardening, black spruce seedlings, PP(67) 141
spinach leaf ethylene production, floral induction, JEB 1218
photoperiodism, floral induction, cinnamic acid derivatives, root tissues, PP(66) 15
photosensitivity, seed germination, biphasic fluence response, PP(67) 275
photosynthetic acclimation, RuBP carboxylase level, tomato leaf, JEB 200
photosynthetic light response, direction of illumination, JEB 399
phototropism, phytochrome, oat coleoptile, elongation rate, JEB 542
phytochrome control, cellulase activity, germination, JEB 1574
phytochrome, activation,
calcium effect, calmodulin, protein phosphorylation, PP (66) 344
dark incubation, chloroplast development, cucumber, PP (67) 389
betacyanin formation, Ca/Mg chelator effects, PP(67) 626
flower induction, phytochrome pools, Norflurazon-treated seedlings, PP(68) 231
intermediates, linear dichroism, oat, PP(66) 185
seed germination, alternating temperatures, synergism, PP (67) 299
tillering regulation, photosynthate partitioning, wheat, PP (66) 159
plastid development, light-grown barley seedlings, mitochondrial influence, PP(68) 100
post-flowering photoperiod, influence on nitrogen assimilation and leaf growth, soybean, JEB 1611
protochlorophyll phototransformation, proplastid, *Euglena*, PP(66) 309
red and far-red, corn chloroplast development, PP(67) 242
red/far-red ratio, environmental factors, response of *Plantago*, PP(68) 252
red light, germination stimulation, GA effects, PP(67) 285
ultraviolet light, stomatal closure, tef grass, PP(66) 360
UV-B, cucumber sensitivity, intraspecific differences, PP(68) 673

Membranes

aleurone layers, phytase, acid phosphatases, GA effects, barley, PP(67) 182
chloroplasts,
amino acid biosynthesis, glycolytic enzyme effects, spinach, PP(68) 641
CAM plant leaf, isolation, O_2 evolution, malate inhibition, PV 663
development, light effects, phytochrome, corn, PP(67) 242
PS II particles, O_2 evolution, phospholipase and pH effects, PP(67) 620
ultrastructure,
photosynthetic activity, cytokinin effects, PP(66) 685
plastome mutant, tentoxin effects, PP(66) 384
cytosolic pH, fine control, malate metabolism, pH-stat, PP(67) 702
Euglena proplastids, protochlorophyll phototransformation, PP(66) 309
higher plant peroxisomes, beta oxidation, detoxification, compartmentation, PV 397
isolated vacuoles, transtonoplast potential, kiwi, PP(67) 29
membrane potential,
electrogenic pump, K-channel, oscillations, algal cells, JEB 34
potassium channel, temperature effects, JEB 440
protoplasts, pressure effects, JEB 315
membrane resistance, Characeae cells, temperature dependence, PP(66) 134
membrane transport, ionic channels, patch clamp technique, PV 227
microsomal membrane, modification, acyl exchange, fluidity, safflower, PV 45
microsomal membranes, ATPase activity, flooded sunflower roots, PP(67) 55
microsomes,
guard cells, ATPase Mg/K dependent, PP(68) 315
maize root, ATPase, Al toxicity, organic acid protection, PP (68) 189
mitochondria,
alternative oxidase, pathway in higher plants, PP(66) 569
corn leaf, mesophyll, bundle sheath, activities, PP(67) 442
malate oxidation, NADH dehydrogenases, PP(67) 517
patterns of development, seed germination, survey, PP(66) 653
seed germination, alternative pathway, JEB 262
stem, tonoplast, membrane potential collapse, pea, PP(67) 136
ultrastructure, anoxia, hygrophytes, JEB 685
nuclei, fluorescent staining, flow cytometry, DNA analysis, PP (68) 471
organelles, photorespiratory nitrogen cycle, evaluation, PP(66) 169
phosphatidyl liposomes, permeability, potato steroidal glycoalkaloid effect, PP(68) 436
plasma membrane,
ATPase, characterization, phase partition, PV 25
barley root, ATPase, triacontanol stimulation, PP(68) 20
detection by gold labelling, soybean root protoplasts, PP(66) 270
proton-transporting ATPase, role in K transport, PP(68) 159
tonoplast, free-flow electrophoresis, spinach leaf, PP(68) 1
plasmalemma,
cation exchange, ion activities, JEB 321
involvement in respiration, PP(68) 67
properties depending on preparation technique, wheat roots, PP(68) 59
SHAM-stimulated NADH oxidation, cytochrome P-450 PP (68) 67
sucrose carrier, proton pump, broad bean, sugar beet, PP (68) 391
plastid degeneration, rhizomania, metabolic and structural changes, PV 73
plastids,
plastoglobuli, norflurazon-treated wheat, phytoene accumulation, PP(68) 39
polypeptide pattern, benzyladenine effects, watermelon, PP (68) 678
prolamellar bodies, membrane structure, dark-grown pine seedlings, PP(67) 345
proton secretion, NADH-oxidation linkage, maize roots, JEB 666
protoplast electrofusion, transfection, electroporation, PP(67) 507
protoplasts,
membrane potential, JEB 238
membrane properties, fusion, rape, PP(67) 359
thylakoids, urea binding site, conformational changes, bean, PP(66) 527
tonoplast,
lutoids, H^+-ATPase, nigericine effect, PP(66) 108
sycamore cells, ATPase, lipids, PV 85
vacuoles,
isolation from protoplasts, solute losses, vacuole selection, PP(68) 695
tomato protoplasts, RNAse activity, PP(66) 79

Metabolism

anaerobiosis, nitrate effects, rice roots, glycolytic intermediates, JEB 1472
carbon and nitrogen partitioning, protein production, chickpea, JEB 1492
chlorophyll, dark biosynthesis, aminolevulinic acid incorporation, barley, PP(68) 222
halophyte, ionic composition, carbohydrates, lipids, nitrogenous compounds, PP(68) 446
photoinhibition, photosynthesis, photorespiration, bean leaves, PV 541

Mineral nutrition

ammonium nutrition, growth, whole-plant and sap composition, castor bean, JEB 1599
dodder nutrition, xylem transport, parasitism, PV 333
inorganic nutrients, relative uptake rates, nitrogen source, JEB 419
ion transport, PO_4-K-Cl, corn root aerenchyma, xylem, JEB 22
mineral nutrients, hemiparasites, nutrient partitioning, JEB 1274
mineral supplies, ion accumulation,
growth, barley cultivars, PP(67) 159
land race and high-lysine cultivars, barley, PP(67) 166
nitrogen limitation, pea growth, nitrate uptake and utilisation, PP(67) 109
nitrogen nutrition level, pine seedling growth, RuBisCo and protein levels, PP(68) 245
nitrogen nutrition, growth, metabolism, NO_3 and NH_4 effects, bean, PV 679
nitrogen starvation, photosynthesis rate, chloroplast ultrastructure, soybean, PV 569
NO_3 and NH_4 nutrition, glutamate synthase, maize seedlings, PP(66) 413
nutrient inflow rates, limits, root systems, PP(68) 551
nutrient levels, switches, growth, yield, winter wheat, PP(66) 583
peat-forming plants, ammonium and nitrate nutrition, growth, metabolism, PP(66) 339
phosphate deficiency, effect on phosphate uptake, tomato, PP (67) 23

phosphate deprivation, root and stolon transport, white clover, JEB 577
phosphate nutrition, extracellular phosphatases, ectomycorrhiza, pine sp., PV 173
phosphate supply, K uptake, herbicide uptake, growth, wheat and maize, PP(68) 154
soilless cultures, nutrient solution choice, computer software, PV 283
sulphur deficiency, nitrogen compound accumulation, maize, PP(68) 608
zinc deficiency,
phosphate-induced, enhanced phosphate uptake, cotton, PP (68) 483
phosphate uptake, impaired shoot control, cotton, PP(68) 491

Nitrogen metabolism

alfalfa root nodules, nitrate metabolism, water stress, JEB 798
amaryllidaceae alkaloids, distribution, ontogenic variations, PP(68) 657
amino acid biosynthesis, glucose nutrition, ectomycorrhiza, NMR monitoring, PV 209
amino acids, total nitrogen, shoot development, pine seedlings, PP(67) 435
ammonia and nitrate assimilation, CO_2 starvation, unicellular alga, PP(68) 34
aromatic amino acid biosynthesis, pure chloroplasts, regulation, spinach, PP(68) 641
bacterial symbiosis, clover root exudate, rhizobium binding lectin, PP(66) 575
chloroplastic enzymes, synthesis, ribosome-deficient leaves, rye, PP(67) 145
ectomycorrhiza,
inoculation, conifer seedlings, nutrient solution, PP(67) 333
nitrogen productivity, growth, pine seedlings, PP(68) 575
enzymes, activity, distribution, maize kernel, PP(67) 247
gaseous ammonia, leaf sorption, Italian ryegrass, JEB 919
glutamine metabolism, copper toxicity, JEB 947
glycine metabolism, carrot cells, stable isotope labelling, PV 1
homoserine synthesis, CO_2 fixation, pea seedlings, PV 411
ineffective nitrate utilization, enhanced nitrogen fixation, pod fill, PP(68) 689
legume-rhizobium symbiosis, nodule initiation physiology, PP (67) 262
nitrate, uptake-reduction-storage,
daily changes, spinach, PP(66) 550
low light, spinach, PP(66) 557
nitrate accumulation, osmotic potential, leaf elongation, spinach, JEB 1093
nitrate reductase,
environmental factor effects, eggplant leaves, PP(67) 73
extraction, measurements, improved methods, oat, PV 377
light and oxygen regulation, oat leaves, PP(68) 387
nitrate assimilation, root-shoot distribution, legumes, PP (66) 630
nitrate reduction, tungstate inhibition, perennial tissues, black alder, PP(68) 347
nitrate transport, tracer techniques, barley seedlings, JEB 429
nitrate uptake and utilization, pea growth, nitrogen limitation, PP(67) 109
nitrate/ammonium ratio, pH homeostasis, soybean, JEB 341
nitrogen assimilation, tabtoxin effects, PP(67) 649
nitrogen compound accumulation, sulphur deficiency, maize, PP(68) 608
nitrogen fixation,
actinorhizal plants, growth, PP(66) 99
inhibition by nitrate/low oxygen/assimilate deprivation, bean, soybean, PP(66) 481
leghemoglobin, stress induced senescence, alfalfa, JEB 597
nitrate and oxygen effects, JEB 1103
soybean nodules, relative efficiency, PV 339
nitrogen source, nitrogen and carbon utilization, symbiosis, JEB 786
nitrogenase, acetylene reduction assay, errors from plant disturbance, JEB 1581
nodulation,
inhibition by nitrate/reduced nitrogen, soybean, JEB 348
initiation, suppression, soybean, PP(66) 669
mutants in polysaccharide production, PP(66) 699
nodule degradation, allantoine release, urea utilization, soybean, PP(68) 685
nodule,
bacteroid, acetylene reduction, superoxide dismutase level, PV 689
proteases, effects on bacteroids, bean, PV 697
nodules, structure, rhizobial strain, peanut, cowpea, JEB 356
non-nodulating pea, strain typing, isoenzymes, PP(66) 46
organic nitrogen storage, short term, asparagine, leaf proteins, soybean, PV 707
photorespiratory nitrogen cycle, evaluation, PP(66) 169
polyamines,
agmatine accumulation, chayote leaves, PP(67) 592
ornithine decarboxylase, maize root, PP(67) 485
powdery mildew infection, barley leaves, PP(67) 630
purine catabolism, xanthine dehydrogenase, nitrogen fixation, PV 263
purine metabolism, caffeine biosynthesis, tea seedlings, PP(68) 275
root nodules, acetylene reduction, sugar composition, nitrate effects, bean, PP(68) 294
supernodulation, soybean mutant, effects on growth, PP(68) 375
tropane alkaloid, level changes, salt stress, JEB 650

Photosynthesis

algae mutant, chlorophyll *b*-deficient, lipid-pigment composition, PP(66) 589
bicarbonate transport, marine algae, JEB 977
bicarbonate-dependent photosynthesis, salinity, JEB 965
carbon exchange, heat stress effects, wheat leaf, JEB 111
CO_2 burst, temperature decrease dependent, illuminated wheat leaves, PP(68) 383
CO_2 enrichment, long term effects, water hyacinth, JEB 1303
CO_2 exchange rates, mobile gas exchange unit, JEB 1234
CO_2 fixation, herbicide-resistant biotype, growth capacity, PV 475
delayed luminescence, transient peaks, phosphorus starvation, green alga, PP(68) 180
fluorescence induction, electron transport, pyridazinone herbicides, barley leaves, JEB 1558
gas exchange, leaf structure, leaf insertion level, wheat, JEB 1323
induction, glyphosate effects, wheat, JEB 299
leaf gas exchanges, peach trees, PP(66) 149
light acclimation, intraplant shading, final leaf size, soybean, JEB 615
light requirements, gas exchanges, tropical vascular epiphytes, PV 315
net photosynthesis, sulphur dioxide, short term fumigation, JEB 1313
O_2 evolution, CAM plant chloroplasts, malate inhibition, PV 663
oxygen inhibition, RuBP regeneration, low temperature, JEB 1170
P700, photooxidation, quantum yield requirement, comment, PV 729
photo-assimilated carbon, nodule partioning, comparmental analysis, JEB 994
photosynthetic acclimation, Calvin cycle enzymes, JEB 200
photosynthetic capacity, cold acclimation, potato species, PP (66) 353

photosynthetic rate, direction of illumination, JEB 399
photosynthetic rhythm, cell shape rhythm, uncoupling from biological clock, JEB 1334
photosynthetic system, thermostability, thermoacidophilic alga, JEB 1698
PS II,
evertion, Mn and protein losses, O_2 evolution, thylakoid lipid protection, PP(68) 136
herbicide interactions, recent developments, PV 509
PS II particles,
inter-quinone electron transfer, herbicide effects, PV 463
phospholipase A_2 effect, alkaline pH, spinach chloroplasts, PP(67) 620
response to humidity changes, sunflower and soybean leaves, JEB 1842
zinc inhibition, effects on photosynthetic electron transport, bean, PP(66) 717

Proteins

biosynthesis, cytosolic and membrane-bound ribosomes, pine strobili, PP(66) 144
cadmium-binding compounds, low molecular weight, soybean roots, JEB 956
calmodulin, purification, tobacco leaf level, PV 559
chloroplast protein synthesis, barley leaf development, leaf excision, JEB 230
crystalloid storage protein, hydrolysis, seed germination, castor bean, JEB 1879
extracellular proteins, localization, characterization, pea internodes, PP(67) 397
germination proteins, mRNA, dessication, pea, JEB 754
glycoproteins, peroxidases, glycosylation inhibition by tunicamycin, peanut cells, JEB 1708
herbicide-binding protein, phenylglyoxal binding, arginine modification, PV 485
homologous globulins, embryos, cereals, JEB 1863
phytohemagglutinins, latex lectins, isolation, characterization, PP(67) 193
polypeptide organisation, PS II particles, herbicide binding, PV 509
prolamins, characterization, meadow grasses, JEB 633
protein phosphorylation, Ca-dependent, tobacco pollen, PP (67) 151
protein sulfhydryl, glutathione, sulfate/chloride/selenate effects, spinach, PP(68) 477
protein synthesis,
in vitro translation, polyamine effect, rice seed, PP(68) 441
pattern changes, ascomycete differentiation, PP(68) 403
polyadenylated RNA metabolism, germinating wheat, PP (67) 310
RNA synthesis, pollen germination, apple, PV 53
proteins, amino acids, autumnal changes, leaves of woody species, PP(67) 102
storage proteins, chestnut seeds, sequential extraction, JEB 1872
sucrose carrier, NEM and PCMBS binding and release, beet leaf, PV 355
urea binding site, bean chloroplasts, conformational changes, PP(66) 527

Stress

aluminium toxicity, nutrient solution, honeylocust, JEB 775
anaerobiosis,
avoidance mechanisms, lenticel formation, pine species, PP (68) 540
growth and root morphology changes, pine species, PP(68) 523
tissue nutrient level changes, pine species, PP(68) 532
anoxia, imbibition, seed coat leakage, seedling survival, soybean, PP(68) 625
chilling tolerance, assessment technique, PP(67) 659
chilling,
sensitivity, polyamine levels, bean cultivars, JEB 1036
translocation inhibition, phylogenic sensitivity, JEB 389
cold acclimation, Rb and Ca influx, wheat roots, uncoupler effects, PP(68) 209
cold shock, calcium fluxes, potassium uptake, membrane potential, corn roots, PP(67) 576
cold storage, cut rose flowers, physiological responses, PP(67) 205
cold tolerance, seedling growth, tomato spp., PP(66) 659
copper toxicity, glutamine metabolism, JEB 947
defoliation, leaf rejuvenation, ion supply capacity of roots, bean, PP(67) 97
dessiccation,
cryopreservation, recalcitrant seed embryo, JEB 1388
seed germination, translatable mRNA, bean, JEB 364
drought,
CO_2 assimilation, tree species, PP(66) 521
effects on phospholipids, frost resistance induction, wheat, PP(67) 92
drought resistance, far-red light effect, ionic content, cotton leaves, PP(66) 37
flooding,
ethylene accumulation, ABA level, wilting, bean, PP(66) 257
gas exchange, transpiration, blueberry, PP(67) 545
kiwi, physiological and growth responses, PP(66) 75
mangrove root aeration and respiration, aerenchyma, JEB 1225
root microsomal membranes, ATPase activity, sunflower, PP(67) 55
water relations, potassium, leaf growth, pea, JEB 1479
freezing injury, algal cells, cryomicroscopy, JEB 842
frost resistance, morphogenesis, hormone effects, berseem clover, JEB 1542
frost tolerance,
cold acclimation, photosynthesis, respiration, potato species, PP(66) 353
salt tolerance, hydroxyproline-resistant potato cells, PP(68) 359
heat and chilling injury, protection by triadimefon, bean, PP (67) 353
heat stress, wheat leaf photosynthesis, JEB 111
hypobaric conditions, stomatal aperture, senescence syndrome, oat leaves, PP(66) 283
hypoxia, alcohol dehydrogenase kinetics, barley, JEB 857
imbibition damage, dead tissues, solute leakage, vigour, dwarf French beans, JEB 716
mechanical perturbation,
thigmomorphogenesis, wood anatomy, loblolly pine, PP(66) 219
wind, thigmomorphogenesis, ethylene, pine, fir, PP(66) 227
nutrient stress, potassium, growth rate, barley, PP(66) 122
phthalate plasticiser toxicity, glasshouse, radish bioassay, JEB 883
rubbing, elongation inhibition, Co prevention, ethylene production, PP(67) 552
salinity, osmotic potential, xylem transport, tomato fruit, JEB 1294
salt injury, membrane leakage, leaves, woody species, PP(67) 87
salt resistance, mass selection, rhodes grass, PP(66) 443
salt stress,
plasmalemma, sodium-calcium interactions, JEB 321
proline-accumulating halophyte cells, PP(67) 173
solute accumulation, stress resistant crops, JEB 1435
tritical halophyte, growth, osmotic adjustment, PP(67) 129
tropane alkaloid level changes, JEB 650
salt tolerance, leaf solute composition, perennial grasses, JEB 1114

shoot top-pruning, mulberry, effects on RuBisCo and leaf constituents, JEB 1836
sulphur dioxide, short term fumigation, net photosynthesis, JEB 1313
vessel-obstructing gels, *Fusarium* infection, banana roots, PP (66) 298
water stress,
alfalfa root nodules, nitrate metabolism, JEB 798
cavitation, embolism, woody plants, PP(66) 397
chilling, ABA pre-treatment, JEB 1854
correlation RuBP carboxylase and stroma crystals, willow, JEB 89
excised maize roots, increased ABA level, PP(68) 215
fenugreek seed germination, osmoregulation, growth, PP (68) 129
intracuticular lipids, transpiration rate, oat, PP(66) 9
jute seeds, calcium pretreatment, phosphate uptake, PP(68) 86
membrane lipid changes, rape root cells, PP(68) 53
polyamine level, barley leaves, JEB 170
resistance, chromium VI, bean, JEB 178
ultrasound emission, cavitation, wood, JEB 1245
wilting, tomato mutant, ethylene production, ABA effect, JEB 535
wind effects, thigmomorphogenesis, wood anatomy, Fraser fir, PP(66) 211

Techniques

acoustic emission, stem psychrometer, water stress, woody plants, PP(66) 397
amino acid synthesis monitoring, NMR, ^{13}C, glucose nutrition of fungus, PV 209
apoplastic water volume determination, conifer needles, PP (66) 129
auxanometer, continuous measurements, microelongation, spinach petiole, PV 383
computer simulation, root tip growth, rhizobium induced hair curling, PP(66) 476
computer software, nutrient solution choice, soilless cultures, PV 283
cryomicroscopy, freezing injury, algal cells, JEB 842
cytometry, flow cytometry, stained nuclei, DNA analysis, PP (68) 471
electron probe X-ray microanalysis, radial cation transport, aerenchyma, JEB 823
enzyme immunoassays, IAA determination, citrus tissues, PP (68) 265
EPR measurements, free radical content, seed viability, JEB 1675
exudation method, phloem sap collection, pesticide mobility, PV 123
flow cytometry, cotton protoplasts, cell cycle parameters, JEB 1211
free-flow electrophoresis, tonoplast preparation, spinach leaves, PP(68) 1
freeze-substitution, fluorescent tracers, water pathways, wheat leaves, PP(66) 637
gene transfer methods, electroporation, microinjection, foreign DNA transfer, PP(68) 566
HPLC,
phosphatidylcholine rapid preparation, PV 599
gas chromatography, mass spectrometry, ABA detection, willow, PP(66) 406
immuno-electron microscopy, oxidoreductase localization, wheat etioplasts, PP(66) 616
immunofluorescence, beta-amylase localization, barley, PP (67) 383
infra-red gas analyser, mobile gas exchange unit, JEB 1234
liquid-membrane micro-electrodes, fabrication, internal pH, JEB 1416
micro drop recorder, sap bleeding rate, JEB 676
microspectrophotometry, flavonol glycoside detection, leaf cells, JEB 61
mycorrhizal infection estimation, fungal chitin assay, PV 201
non-carcinogenic solvent, better extraction of phosphatidylinositol, PP(68) 467
patch clamp technique, ionic channels, membrane transport, PV 227
phase partitioning/sucrose gradient, plasmalemma preparation, comparison of properties, PP(68) 59
photo-acoustic spectroscopy, pubescent leaves, JEB 289
pycnometry, helium gas chromatography, root porosity, PV 117
radioactive pulse, $^{11}C/^{13}N$ movements in phloem and xylem, microfronts, JEB 1780
recombinant DNA technology, crop improvement, PP(68) 560
thick section high voltage EM, statolith, gravitropism, JEB 693
TLC bioassay, stigma extract effects on pollen germination, JEB 406
ultrasound emission, water stress, cavitation, wood, JEB 1245
vibrating probe, electrical currents, stomatal activity, JEB 876
X-ray microanalysis,
ion distribution, nectary hairs, JEB 940
root ion distribution, salinity, PP(66) 328
ultrastructural studies, algal cell compartments, JEB 1725

Translocations

ammonium uptake and transport, compartmental model, maize, JEB 1619
apoplastic solute transport, lanthanum as tracer, halophytes, JEB 807
assimilate export, phloem loading, light sensitivity, PP(67) 227
bicarbonate transnodal transport,
anoxia, streaming rate, algae, JEB 1341
pressure gradient effects, algae, JEB 1353
^{14}C translocation, woody plants, vascular phyllotaxy, PP(66) 21
cation-anion redistribution, xylem, phloem, tomato, JEB 331
chilling inhibition, phylogenic distribution of sensitivity, JEB 389
cold blocking, leaf sugars, carbon partitioning, broad bean, PP (68) 145
cytokinin translocation, apple shoot development, PP(68) 431
herbicide translocation, paraquat resistance, PP(66) 605
phloem loading, differential photosynthate uptake, mesophyll and veins, JEB 1899
phloem mobility, phloem sap collection, pesticide systemy, PV 123
phloem translocation,
assimilate partitioning, water potential, JEB 495
cooling response, source-sink partitioning, JEB 277
phloem unloading, pea seed coat, surgically modified seeds, JEB 1151
stem and leaf phloem loading, alkali ions, tomato fruits, JEB 928
stem, petiole, radioactive pulse, $^{11}C/^{13}N$, microfronts, JEB 1780
sucrose release, amino acid release, soybean leaf discs, PP(66) 319
thermo-osmotic partition, gases, leaf anatomy, aeration, JEB 1450
turgor-sensitive transport, assimilate, seed coat, cotyledon, pea, JEB 1462
turgor-sensitive unloading, phloem, seed coat, JEB 1006
xenobiotics, uptake and release, phloem systemy, screening, broadbean leaf, PV 431
xylem conductance, pit, tracheid, fern, JEB 1054
xylem perfusion, stelar proton pump, fusicoccin, onion roots, JEB 1136
xylem transport, dodder nutrition, transpiration, PV 333

Tropisms

gravistimulation,
  lens root, mitotic activity, nuclear DNA, PV 639
  statocyte ultrastructural changes, grass nodes, JEB 693
gravitropic stimulus, cell differentiation, lentil roots, PP(67) 460
gravitropism, corn root segments, ethylene production, calcium effects, PP(67) 570
phototropism, oat coleoptile, elongation rate, JEB 542
root gravitropism,
  ABA, xanthoxin, norflurazon effects, maize roots, PP(67) 472
  calcium, cytochemical localization, maize, JEB 73

Water relations

apoplastic water volume, determination, conifer needles, PP(66) 129
cuticular conductance, humidity response of stomata, JEB 517
dehydration, dielectic-gravimetric measurements, marine alga, JEB 375
dehydration-intolerance, seed germination, subcellular damage, mangrove, PP(67) 291
drought resistance, barley leaf epicuticular lipids, PP(68) 13
flooding, kiwi, leaf water relations, PP(66) 75
frost hardening, phytochrome action, black spruce seedlings, PP(67) 141
hydraulic conductance, xylem resistances, fern, JEB 1054
hydraulic conductivity, water potential, apple, rootstock effect, PP(67) 421
hydraulic root conductivity, stomatal conductance, blueberry flooding, PP(67) 545
hyperhydric malformations, vitrification, membrane permeability, carnation, PV 647
moisture loss, seedling growth, soybean, JEB 1663
osmotic effects, assimilate transport, seed coat, cotyledon, pea, JEB 1462
osmotic potential, seed germination rate, beet seed germination, JEB 729
osmotic pre-treatment, seed germination, corn-cockle, JEB 765
salinity, halophyte, seedling growth, tissue osmolality, JEB 160
soil water potentials, salinity, seed germination, desert shrub, PP(67) 305
stomata,
  abnormal opening, wilt, coconut palm, JEB 1398
  closure,
    ABA induction, phenolic compound reversal, JEB 129
    ultraviolet irradiation effects, tef grass, PP(66) 360
  transpiration,
    ABA, apical growth, willow, PP(66) 409
    action spectrum for blue light, wheat, PP(66) 207
    blue/red light synergism, wheat, PP(66) 202
flooded peas, water relations, potassium, leaf growth, JEB 1479
stomatal activity, leaf surface electrical currents, JEB 876
stomatal control,
  chilling effects, modelling, pea, bean, JEB 657
  leaf conductance, CAM plants, CO_2 release, PP(68) 353
stomatal opening, circadian rhythm, ion flux involvement, JEB 188
swelling responses, guard cell protoplasts, ion specificity, PP(66) 463
turgor-sensitive unloading, phloem, seed coat, JEB 1006
vapour pressure deficit, photosynthesis, conductance, JEB 1842
water loss, leaf hairs, acid exudate, chickpea, JEB 640
water movement, storage, leaf anatomy, desert succulent, JEB 1044
water pathways, mestome sheath, suberized lamellae, wheat leaves, PP(66) 637
water potential,
  diffusive resistance, leaf, water stress and ABA effects, JEB 1854
  growth of snow mould fungi, disease resistance, grasses, PP(68) 175
  phloem translocation, assimilate partitioning, JEB 495
  rejuvenation, poplar buds, apical dominance release, PP(68) 287
water stress, resistance, chromium VI, bean, JEB 178
water vapour pressure, intercellular air spaces, turgid leaves, JEB 504
xylem water potential, mangrove, leaf salt balance, PP(67) 67

Species Index 1986

A

Abies fraseri
PP(66) 211, 227
Abies grandis
PP(66) 129
Abutilon striatus
JEB 940
Acacia acuminata
JEB 1274
Acer pseudoplatanus
PP(66) 536
PV 85, 97
Acer rubrum
PP(66) 521
Acer saccharum
PP(66) 397
Actinidia sinensis
PP(66) 75
PP(67) 29
Agave deserti
JEB 1044
Agrobacterium tumefaciens
PP(68) 458
Agropyron elongatum
PP(67) 129
Agropyron sp.
JEB 625
Agrostemma githago
JEB 765
Alisma plantago-aquatica
JEB 685
Allium cepa
JEB 1136
PP(66) 293
Alnus glutinosa
JEB 1780
PP(67) 102
PP(68) 347
Alnus incana
JEB 786
PP(66) 99
Alopecurus pratensis
PP(66) 251
Amaranthus caudatus
PP(67) 584, 588, 626
Amelanchier alnifolia
PP(67) 87
Amyema preissii
JEB 1274
Anabaena cylindrica
PP(67) 634
Anabaena variabilis
PP(68) 320
Arabidopsis thaliana
PP(66) 49, 265
PP(67) 315
Arachis hypogea
JEB 80, 356, 1708
Araucaria hunsteinii
JEB 1388
Ascophyllum nodosum
JEB 375
Asparagus sprengeri
PP(67) 649
Aster amellus
PP(67) 173
Aster tripolium
